Hi.

I am forwarding Jim Snyder's email for reference.

For vehicle X400RXX-0005, please cover the radar sensors as per the attached document and prepare the vehicle for dyno testing. No vehicle drain is needed. Please transfer to the lab when the work is complete.

The two new VW vehicles (a black 2015 Audi Q5 (VIN: Ex: 6 Personal Privacy (PP)) and a silver 2015 Audi A7 (VIN: Ex: 6 Personal Privacy (PP))) are in the PEMs area. I understand that the vehicles are already starting to be fitted with PEMs equipment.

Please let me know if you have any questions.

Thanks,

Lynn

Lynn, Here 's an update of the Audi V6s coming into the lab for confirmatory tests.

RXX-0005 (Touareg) has completed PEMS testing and is available for completing its testing prep. I believe it still needed covering the radar sensors. It is currently parked inside the PEMs garage. Attached is a new handout outlining how to cover radar sensors.

RXX-0006 (Audi Q7) is also done with PEMs and I believe the lab may already have it. I don't think Joe had anything more to do on it prior to lab testing.

Just received a black 2015 Audi Q5 (VIN: [Ex. 6 Personal Privacy (PP)]) and a silver 2015 Audi A7 (VIN: [Ex. 6 Personal Privacy (PP)]) I parked them outside across from the PEMS garage with the thought of doing PEMs first due to test cell availability. We can talk about that. I have some parameter info on them but not yet in spreadsheet form. The keys are in the PEMs lab keybox.
